

μKard Programming Tool

Quick user guide

09/2024

Introduction

This module is used to manage Kaptia μ Kard devices. It has a micro USB connector to connect the module to the USB port of a PC.

Management is carried out through the Kaptia Key software

To use the device, it must be connected to the USB port of the PC where the Kaptia Key application is installed through the microUSB connector specified in the image above. The other connector (μ Kard connector) must be connected to the μ Kard card reader when managing.

For this management, the Kaptia Key software will be used.

This device is *plug and play*.

Technical characteristics

Power	via USB
Consumption	<100mA
Compatible with	Kaptia Key
Updatable	No
